ACIT 4850 – Enterprise System Integration – Winter 2026

Lesson 10 – Continuous Delivery

For Lesson 10 we will be starting to deploy the sample applications from your CI pipelines. So, we will be adding Continuous Delivery (CD) to our pipelines. Please read the following on Continuous Delivery for the Lesson 10 class:

- https://continuousdelivery.com/, including:
  - Introduction
  - Principles
  - Foundations (Configuration Management, Continuous Integration, Continuous Testing)
  - Implementing Continuous Delivery (Architecture, Culture, Patterns)

We will be using Docker for the Continuous Delivery stages of our pipelines, both building and deploying Docker images. If you wish, please review the following on Docker:

- Docker Overview: https://docs.docker.com/engine/docker-overview/
- Docker Compose Overview: https://docs.docker.com/compose/
  - https://docs.docker.com/compose/intro/features-uses/
  - https://docs.docker.com/compose/intro/compose-application-model/
